How should I use this medicine?

This medicine is for injection under the skin. It is given by a health care professional in a hospital or clinic setting. In a copy of the Vaccine Information Statements will be given before each vaccination. Read this sheet carefully each time. The sheet may change frequently. Talk to your pediatrician regarding the use of this medicine in children. While this vaccine may be prescribed for children as young as 9 months of age for selected conditions, precautions do apply. This vaccine is not for infants under 9 months of age.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.
NOTE: This medicine is only for you. Do not share this medicine with others.

Where should I keep my medicine?

This drug is given in a hospital or clinic and will not be stored at home.

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.

What side effects may I notice from receiving this medicine?

Side effects that you should report to your doctor or health care professional as soon as possible: allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue; breathing problems; confusion, trouble speaking or understanding; seizures; trouble walking; unusually weak or tired. Side effects that usually do not require medical attention (report to your doctor or health care professional if they continue or are bothersome): fever; headache; pain, redness, or irritation at site where injected.

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.
